

Knauf Joint Cement Premium

Data Sheet

Knauf Joint Cement Premium is a lightweight air drying compound for bedding tapes and finishing joints by hand or machine application. Knauf Joint Cement Premium produces an exceptional finish with minimal sanding effort.

Knauf Application

- Interior applications only
- For jointing of gypsum boards
 - For bedding joint tapes and finishing joints by hand or machine application

Physical Characteristics

Bag Size	Bags per pallet	Material No.	Approx. Coverage
kg			m ² per bag
20	42	622337	80 (for two coats of finish)

Storage and Handling

Store dry. Protect against frost, high temperatures and exposure to direct sunlight. Recommended for use within 12 months of manufacture.

Compliance

Bedding filler for interior use acc. to BS EN 13963: 2014

Performance Data

In compliance with BS EN 13963: 2014, the product is subject to initial type testing and continuous factory product control and bears the CE marking.

Technical Data

- Reaction to fire: A2
- Flexural Strength: NPD

Product Features

- 12 months shelf life
- Air drying
- Up to 24 hours drying time (depending on conditions)

Application/Installation

Mixing:

Sprinkle the powder into a suitable clean mixing container with clean, cold tap water.

Allow to stand for 30 minutes.

Bedding and Finishing joint tape:

Apply Knauf Joint Cement Premium to the recess formed by the plasterboard tapers. Apply Knauf Joint Tape, submerging the tape into the compound with a taping knife or trowel.

When dry apply second coat.

If sanding is required, at least 120 grit sandpaper is recommended.

Suitability:

Suitable for use on all plasterboards manufactured to BS EN 520:2004.

Use in accordance with British Standard Code of Practice BS 8212:1995 and BS 8000: Part 8:1994 workmanship.

Cleaning:

Clean containers and tools with water immediately after use.
